

The new ScreenLine motorized screen.

A project which represents a shift in the design of rolling motorized screens. Its particular, harmonious and supple line blends into interior design environments perfectly.

The shape of the box allows installation flush against sharp edges while the elegant lines minimize the visual impact.

The upper part of the box, perfectly horizontal, makes it possible to place the left, central and right satellites of the audio equipment, while in the rear part of the box there is a special groove where it is possible to keep the connection cables of the loudspeakers out of sight. The screen can come with a room lighting system made of an RGB LED stripe which is placed inside the downward oriented groove, projecting light behind the fabric.

Connected to a home automation system, it becomes a light source which transforms the environment according to the colour and intensity chosen.

Technical details

Screen characteristics

- 90° rear angle for better ceiling installation
- hidden fixing brackets
- supporting surface for L-C-R loudspeakers
- prearranged groove for audio cables
- RGB LED back lighting compatible with all home automation control systems (on request)
- front surface drop in order to improve flatness
- motor on the right side
- custom features
- particularly silent motor available on request up to 300 cm base

Available fabrics

- White Ice
- Home Vision
- Microperforated
- Grey High Contrast
- Nova-Vision
- Coral retro-projection
